

Product Description: Catalyzed aliphatic resin base coating for wood, tile, plastics and formica

Uses: Case goods, occasional furniture, dining room tables and chairs, conference tables and other contract furniture with a deep, lustrous, glass-like finish, or floors.

Benefits:

- High gloss "wet look"
- 98% solids for thicker finish
- Meets and exceeds green seal standards
- Excellent chemical and heat resistance
- Dries to 80% of the hardness of glass

- **Performance:**
- Superior build of 6-8 wet mils on vertical surfaces
- Excellent filling properties
- E.P.A Compliant NO VOCs (under 5 grams) if exempt solvent used

Seagrave is a technology driven manufacturer serving industrial, architectural design, maintenance, and the home furnishing industries

MiraGlaze®

Benefits Over Polyester and Pour-on Epoxy:

- Easy sanding vs. polyester coatings which do not tolerate sanding aids
- 100% solids but need 15% xylene for thinning if you use a spray gun
- No shrinkage on curing, there will be no shrink marks, which can develop with polyesters
- Dries hard in 2 hrs. and can be sanded after 4hrs.
- Pot life is 30-45 minutes and mix is 1:1 ratio
- Alternatively, you can use dual component spray equipment
- No VOCs because there is no solvent or you can use xylene or Oxitol®100 which is an exempt solvent for thinning
- Resins made in USA so not subject to import logistics, or USEPA TSCA restrictions
- No formaldehyde
- No styrene, which is a suspected carcinogen. See Safety data sheet for recommended protective respirator equipment required for sprayer.
- No peroxide hazard or accelerators like cobalt, which can be dangerous to the operator if the two are mixed together or in the wrong proportions
- Does not yellow like epoxy or polyester and has excellent exterior resistance

Seagrave Coatings products offer unique and beautiful high gloss finishes.

Our MiraGlaze® is perfect for original, limited edition and fine art objects and furnishings. It makes for a spectacular dining room table or entertainment unit. The product is also ideal for premium kitchens, furniture, decorative accessories and musical instruments, and over Plexitone® for a multi-color stone or terazzo floor finish or for refinishing worn formica countertops.
